

Known Worldwide for Quality and Value in Packaging Syringes

We offer the benefits of over thirty five years of experience in the design, development, and production of plastic syringes. We've created hundreds of innovative packaging solutions for veterinary pharmaceuticals, human health care products, adhesives and lubricants, pesticides, and specimen collection.

Plas-Pak's engineering and design staff can meet the special needs of your project, and we look forward to applying our imagination and expertise to solve your packaging requirements.

FEATURES INCLUDE:

- Controlled dispensing & precision placement of pastes, gels, and fluids
- Proven leak-free performance and package integrity; ideal for primary product packaging & pre-filling for unit & multiple measured dose products
- Plas-Pak's Dial-A-Dose® plunger system provides fast, accurate measured dose dispensing
- Lower cost, greater convenience, and reduced waste as compared to collapsible tube, squeeze bottle, jar, or can
- One piece plungers with integrally-molded seals provide improved product compatibility and lower cost; plunger retracts to eliminate drip, drool, and product waste
- Variety of application-engineered, molded-in-place nozzles
- Snap locking, double seal tip caps
- Zero-draft barrels, self-venting, with anti-backup rings for easy air-free plunger insertion; easy to fill and assemble
- Sterilizable, non-toxic materials
- Rigid barrel can be printed, labeled, or custom colored for visual impact
